Vitess on Kubernetes

2015

VITESS.IO

The image shows a screenshot of a Google Cloud Platform blog post. At the top is the Google Cloud logo (a hexagon divided into six colored segments: blue, yellow, red, white, light blue, and light green). To the right of the logo is the title "Google Cloud Platform Blog". Below the title is a subtitle: "Product updates, customer stories, and tips and tricks on Google Cloud Platform". The main heading of the post is "Scaling MySQL in the cloud with Vitess and Kubernetes". Below the heading is the date "Friday, March 20, 2015". A snippet of the post's content reads: "Your new website is growing exponentially. After a few rounds of high fives, you start scaling to meet this unexpected demand. While you can always add more front-end".

The image shows a Google search results page. The search query in the bar is "kubernetes release date". Below the search bar are navigation links: All (underlined), News, Images, Videos, Shopping, More, Settings, and Tools. It displays the result: "About 6,630,000 results (0.49 seconds)". The first result is a link to "Kubernetes / Initial release dates". Below the result is the date "July 21, 2015". To the right of the search results is the Kubernetes logo, which is a blue hexagon containing a white steering wheel.
